# Over the limit? Ask a do-it-yourself breath-test machine in the car park!

By Rhodri Phillips

Do-it-yourself breath-test machines have been installed at car parks so drivers can check whether they **1)** ..... over the drink limit before they sit behind the wheel. Each user is given a clean pipe to blow through until they are told to stop and a reading flashes on a screen a few seconds later saying whether they can legally drive. The **Alcolizer** machines use the same technology as police breath testers.

But a spokesman for the Association of Chief Police Officers told motorists not to rely on the machines and issued a general warning not to drink and drive. He said: “We see a lot of these gadgets. It is difficult to know how precise they are. Our message is: ‘Do not drink and sit behind the wheel. It’s as simple **2)** ..... that.’ A spokesman for Risk Shifters, the company distributing the breath-testers, said: “The whole point of having a breath-tester in a car park is not to encourage drinkdriving. It is to give users information. It does not give them a guarantee. It does not give them a defence if they are then stopped by the police and fail a test. The body absorbs alcohol

at a regular rate and your alcohol level can rise for **3)** ..... time after you have had a drink. If you are close to the legal limit when you use the Alcolizer, you should wait a few minutes and test yourself again.”

Four **Alcolizers**, which cost £5,000 each, have been installed in car parks run by Q-Park. One in Leeds is free of charge and three in Glasgow cost £1 a time. Q-Park has bought three more machines, **4)** ..... it plans to install in Nottingham, Sheffield and Cardiff and Risk Shifters is also in talks with other car park operators.

Australian maker, **Alcolizer Technology**, also produces breath testers for police in Australia and China. Frank Soodeen, of the charity **Alcohol Concern**, supports the machines. He says: “This sounds like a good idea. We would welcome any device which allows drivers to accurately check the amount they **5)** ..... drunk. It encourages motorists to act responsibly. We support that.”

Road safety charity **Brake** welcomed the Alcolizer but warned drivers not to depend on it too much. Spokeswoman Dianne Ferreira said: “In principle, it is good. It makes people think about how much they have drunk. But there is a danger that motorists will try to drink to the limit and then use the machine to check they are OK. They must be careful.”

**Task A1** (10 points) (2 points for each correct answer)

Read the article about DIY breath-test machines.

Choose the best word to fill each gap – A, B or C – and write the letter in the box.

Put the letter here

|   |        |         |         |          |
|---|--------|---------|---------|----------|
| 1 | A are  | B were  | C was   | <b>A</b> |
| 2 | A than | B as    | C how   | <b>B</b> |
| 3 | A some | B any   | C no    | <b>A</b> |
| 4 | A who  | B where | C which | <b>C</b> |
| 5 | A are  | B did   | C have  | <b>C</b> |

**Task A2** (10 points) (2 points for each correct answer)

Read the article about DIY breath-test machines again.

Answer the questions below.

|   |   |
|---|---|
| 1 How long do drivers have to wait to get the result of the test? | <b><i>A few seconds</i></b>                                 |
| 2 What do police recommend drivers to do?                         | <b><i>Don't drink and sit behind the wheel of a car</i></b> |
| 3 In which cities are Alcolizers already in use?                  | a) <b><i>Leeds</i></b><br>b) <b><i>Glasgow</i></b>          |
| 4 How many Alcolizers are already in use in the UK now?           | <b><i>4</i></b>   |
| 5 Who manufactures the machine?                                   | <b><i>Alcolizer Technology</i></b>                          |
